#### **NEW QUESTION: 1**

You are an administrator with an application running in Oracle Cloud Infrastructure (OCI). The company has a fleet of OCI compute virtual instances behind an load balancer. The load balancer backend set health check API is providing a 'Critical' level warning. You have confirmed that your application is running healthy on the backend servers. What is the possible reason for this 'Critical' warning?

- A.** The load balancer listener is not configured correctly.
- B.** The route table associated with the subnet in which the backend server is provisioned does not include the route for the OCI load balancer.
- C.** The security list associated with the subnet in which the backend server is provisioned does not include the IP range for the source of the health check requests.
- D.** A user does not have correct Identity and Access Management

(IAM) credentials on the backend servers.

**Answer: C**

**NEW QUESTION: 2**
