These interactions have inspired us to do better.

**NEW QUESTION: 1**

Beth works as a project manager for BlueWell Inc. Which of the following tools and techniques of Administer Procurements process will Beth use to manage contracts, and procurement documentation and records?

- A. Inspection and Audit
- B. Payment System
- C. Performance reporting
- D. Records Management System

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

A records management system is used to manage contract, and procurement documentation and records by the project managers. It includes specific set of processes, related control

functions, and automation tools that are merged as part of the project management information system.

Incorrect Answers:

B: Performance reporting offers the management with the information about how effectively the seller is achieving the contractual objectives.

C: Inspection and audits are required by the buyer and supported by the seller as mentioned in the procurement contract during execution of the project to verify the compliance in the seller's work processes or deliverables.

D: Payment system determines the payments to the seller, which is processed by the account payable system of the buyer after certification of satisfactory work by the authorized person on the project team.

**NEW QUESTION: 2**

Which of the following are the major objectives of Material Requirement Planning?

- A. Control the performance of the order
- B. Determine requirements and support production activities
- C. Determine requirements and keep priorities current.
- D. Control and monitoring material demands

**Answer: C**

**NEW QUESTION: 3**

Which of the following AWS services can be used to monitor AWS resource usage and generate logs?

- A. AWS CloudTrail
- B. Amazon GuardDuty
- C. Amazon CloudWatch
- D. AWS Trusted Advisor

**Answer: B**

**NEW QUESTION: 4**

You create an Azure Machine Learning compute target named ComputeOne by using the STANDARD\_D1 virtual machine image. You define a Python variable named was that references the Azure Machine Learning workspace. You run the following Python code:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

## Explanation

Box 1: Yes

ComputeTargetException class: An exception related to failures when creating, interacting with, or configuring a compute target. This exception is commonly raised for failures attaching a compute target, missing headers, and unsupported configuration values.

Create(workspace, name, provisioning\_configuration)

Provision a Compute object by specifying a compute type and related configuration.

This method creates a new compute target rather than attaching an existing one.

Box 2: Yes

Box 3: No

The line before print('Step1') will fail.

Reference:

<https://docs.microsoft.com/en-us/python/api/azureml-core/azureml-core.compute.computetarget>
