NEW QUESTION: 1

A developer created a custom component to display an HTML table. The developer wants to be able to use the component on different Visualforce Pages and specify different header text for the table. Which tag should the developer use inside the component?

- A. `<apex:define>`;
- B. `<apex:variable>`;
- C. `<apex:param>`;`<meta charset="utf-8" />`;`<apex:param>`;
- D. `<apex:attribute>`;

Answer: D

NEW QUESTION: 2

Durch das Senden einer Nachricht und eines mit dem privaten SchlÃ¼ssel des Absenders verschlÃ¼sselten Nachrichten-Hashs wird Folgendes sichergestellt:

- A. Datenschutz und Nichteinhaltung.

- B. Authentizität und Privatsphäre.
- C. Authentizität und Integrität.
- D. Integrität und Datenschutz.

Answer: C

Explanation:

Erläuterung:

Wenn der Absender sowohl eine Nachricht als auch einen mit seinem privaten Schlüssel verschlüsselten Nachrichten-Hash sendet, kann der Empfänger den öffentlichen Schlüssel des Absenders auf den Hash anwenden und den Nachrichten-Hash abrufen. Der Empfänger kann den Hash-Algorithmus auf die empfangene Nachricht anwenden und einen Hash generieren. Indem der erzeugte Hash mit dem empfangenen abgeglichen wird, wird dem Empfänger sichergestellt, dass die Nachricht von dem spezifischen Absender gesendet wurde, d. H. Authentizität, und dass die Nachricht unterwegs nicht geändert wurde.

Authentizität und Datenschutz werden gewährleistet, indem zuerst der private Schlüssel des Absenders und dann der öffentliche Schlüssel des Empfängers zum Verschlüsseln der Nachricht verwendet werden. Datenschutz und Integrität können gewährleistet werden, indem der öffentliche Schlüssel des Empfängers zum Verschlüsseln der Nachricht und zum Senden eines Nachrichten-Hashs / $\hat{\epsilon}$ < $\hat{\epsilon}$ > Digests verwendet wird. Es kann nur die Unbestreitbarkeit sichergestellt werden, indem der private Schlüssel des Absenders zum Verschlüsseln der Nachricht verwendet wird. Der öffentliche Schlüssel des Absenders, der jedem zur Verfügung steht, kann eine Nachricht entschlüsseln. Somit ist die Privatsphäre nicht gewährleistet.

NEW QUESTION: 3

About the Fusioninsight HD installation process is correct?

- A. Install Manager-> execute preinstall-> LLD tool to configure-> install cluster-> check after installation-> configure after installation
- B. Install Manager-> LLD tool for configuration-> perform Reinstall-> install cluster-> check after installation-> configure after installation
- C. LLD tool configuration-> execute preinstall-> install Manager-> install cluster-> check after installation-> configure after installation
- D. LLD tool for configuration-> execute preinstall-> install cluster-> install Managers-> check after installation-> configure after installation

Answer: C
