NEW QUESTION: 1

You have a /tmp/data directory containing the files .file, file1, and file2. You want to copy the file1 and file2 files only to the /data-old directory that already exists. In a terminal window, which command accomplishes this?

- A. cp /tmp/data/? /data-old
- B. cp /tmp/data /data-old
- C. cp /tmp/data/* /data-old
- D. cp /tmp/data/. /data-old

Answer: C

NEW QUESTION: 2

You are the Office 365 administrator for your company. All users have been assigned E3 licenses and use Office Web Apps to create and edit documents.

A user attempts to access documents stored on a USB flash drive. When the user double-clicks a file that is stored on the USB flash drive, an error message states that Windows can't open the file and needs to know what program to use to open it. You need to ensure that the user can start Office applications and edit Office documents by double-clicking files.

What should you do on the user's computer?

- A.** Copy the files from the USB flash drive to the local hard drive.
- B.** Use Office on Demand.
- C.** Install Office 365 ProPlus from the Office 365 portal.
- D.** Install and configure Microsoft Word Viewer

Answer: C

Explanation:

Explanation

The message "can't open the file and needs to know what program to use to open it" Points to Office not being installed/Windows not recognizing Office is installed on the PC, so would need to download Office 365 ProPlus from the Portal.

NEW QUESTION: 3

A web application is configured in a SharePoint environment. A user receives an application error message that includes a correlation ID.

You need to find out the cause of the error.

Which two actions can you perform to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

- A.** Locate the correlation ID in the Security event log.
- B.** Enable the Developer Dashboard and review the content.
- C.** Locate the correlation ID in the System event log.
- D.** Locate the correlation ID in the Unified Logging Service (ULS).

Answer: B,D
