Answer :

Explanation:

NEW QUESTION: 2

You have developed a MAF application and want to distribute it through public application marketplaces such as the Apple App Store and Google Play.

Identify the two essential tasks you must perform before publishing your application.

- A.** Update the IDE's JDK to the latest version and repackage your MAF application.
- B.** Ensure that the settings `incvm.properties` and `logging.properties` are suitable for a production deployment.
- C.** Edit the application's deployment profiles and set the build mode to debug. This will enable you to troubleshoot the application remotely on your customer's device.
- D.** Avoid updating your MAF version in order to prevent regressions.
- E.** Check if Oracle made a MAF update available. If so, install it and repackage your MAF application to ensure that it conforms to the latest requirements for the target marketplaces.

Answer: A,E
