Just ask a question and you will get the answer promptly.

NEW QUESTION: 1

Your company has a private cloud that is managed by using a System Center 2012 infrastructure.

You have a web application named WebApp1 that is hosted in another datacenter.

The datacenter is not part of the private cloud.

You need to ensure that Service Manager incidents are generated automatically when WebApp1 is unavailable.

What should you create?

- A. an event rule
- B. a Service Level Tracking object
- C. a synthetic transaction
- D. a service offering

Answer: C

Explanation:

I think the key to this question is that the datacenter is not part of the private cloud.

To monitor the application that runs on these traditional platforms we leverage custom MP's, synthetic transactions to be able to test websites, and HTTP probes to test web services ensuring that the outside-in functionality of the application is available.

<http://blogs.technet.com/b/server-cloud/archive/2012/03/29/using-system-center-2012-to-monitor-theinfrastructure-amp-application-layers-for-private-public-and-traditional-environments.aspx>

NEW QUESTION: 2

On November 1, \$1000 worth of work on task A was supposed to have been done (BCWS); however, the BCWP was \$850. Calculate the schedule variance:

- A. (\$150)
- B. \$150
- C. \$100
- D. (\$100)
- E. 85%

Answer: A

NEW QUESTION: 3

Which of the following formats of audio has best effect?

- A. G.722
- B. G.711
- C. AAC_LD
- D. G.719

Answer: C

NEW QUESTION: 4

A certificate used on an ecommerce web server is about to expire. Which of the following will occur if the certificate is allowed to expire?

- A. The ecommerce site will no longer use encryption.
- B. Clients will be notified that the certificate is invalid.
- C. The ecommerce site will not function until the certificate is renewed.
- D. The certificate will be added to the Certificate Revocation List (CRL).

Answer: B

Explanation:

A similar process to certificate revocation will occur when a certificate is allowed to expire. Notification will be sent out to clients of the invalid certificate. The process of revoking a certificate begins when the CA is notified that a particular

certificate needs to be revoked. This must be done whenever the private key becomes known. The owner of a certificate can request that it be revoked at any time, or the administrator can make the request.
