NEW QUESTION: 1

Which of the following is a benefit of resource pooling?
A. It reduces the number of servers required.
B. It increases the number of servers required.
C. It reduces the number of users required.
D. It increases the number of users required.

A. It reduces the number of servers required.

B. It increases the number of servers required.

C. It reduces the number of users required.

D. It increases the number of users required.

Answer: D

Explanation:

Resource pooling/Multi-Tenancy: The provider's computing resources are pooled to serve multiple consumers using a

multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. There is a sense of location independence in that the customer generally has no control or knowledge over the exact location of the provided resources but may be able to specify location at a higher level of abstraction (e.g., country, state or datacenter). Examples of resources include storage, processing, memory and network bandwidth.
