Sie verwalten einen Microsoft SQL Server-Datenbankserver. In der Produktionsumgebung treten von Zeit zu Zeit verschiedene Probleme auf. Sie müssen für jedes Problem das entsprechende Tool identifizieren.

Welches Tool oder welche Tools sollten Sie verwenden? (Um zu antworten, ziehen Sie das entsprechende Werkzeug oder die entsprechenden Werkzeuge auf das richtige Problem oder die richtigen Probleme im Antwortbereich. Jedes Werkzeug kann einmal, mehrmals oder gar nicht verwendet werden.

Möglicherweise müssen Sie die geteilte Leiste zwischen den Bereichen ziehen oder zu scrollen Inhalt anzeigen.)

Answer:

Explanation:

Erläuterung

NEW QUESTION: 4

Which two tools can you use to troubleshoot or identify connectivity issues between email clients and Microsoft Exchange Online? (Each correct answer presents a complete solution. Choose two.)

- A. Microsoft Connectivity Analyzer
- B. Microsoft Baseline Security Analyzer
- C. Transport Reliability IP Probe
- D. Microsoft Remote Connectivity Analyzer

Answer: A,D

Explanation:

A:

*Microsoft Connectivity Analyzer Tool 1.0

We are excited to announce the 1.0 release of the Microsoft Connectivity Analyzer. This tool is a companion to the Microsoft Remote Connectivity Analyzer web site. The MCA tool provides administrators and end users with the ability to run connectivity diagnostics for five common connectivity symptoms directly from their local computer. Users can test their own connectivity, and save results in an HTML format that administrators will recognize from viewing results on the RCA website.

*The MCA tool offers five test symptoms:

"I can't log on with Office Outlook" - This test is equivalent to the Exchange RCA test for "Outlook Anywhere (RPC over HTTP)". There is an option to run the SSO test provided on the parameters page. "I can't send or receive email on my mobile device". - This test is equivalent to the Exchange RCA test for Exchange ActiveSync. ***New MCA Test*** "I can't log on to Lync on my mobile device or the Lync Windows Store App" - This test checks for the Domain Name Server (DNS) records for your on-premise domain to ensure they are configured correctly for supporting Mobile Lync clients. Also it connects to the

Autodiscover web service and makes sure that the authentication, certificate, web service for Mobility is correctly set up ***New MCA Test*** "I can't send or receive email from Outlook (Office 365 only)" - This test checks Inbound/Outbound SMTP mail flow and also includes Domain Name Server validation checks for O365 customers. ***New MCA Test*** "I can't view free/busy information of another user" - This test verifies that an Office 365 mailbox can access the free/busy information of an on-premises mailbox, and vice versa (one direction per test run).

C:

*Microsoft Remote Connectivity Analyzer (RCA) is a web-based tool that can help you confirm that connectivity for Exchange servers is configured correctly and to diagnose any connectivity issues.

*Microsoft Remote Connectivity Analyzer is a web site that allows you and your users to quickly test connectivity, availability & functionality of your on-premises Exchange and Lync servers and Office 365 services.

Incorrect:

not B: Lync Online Transport Reliability IP Probe (TRIPP) tool is a Java-based tool that checks the transport path between the computer and a Lync Online data center for possible issues.
