And you can just look at the feedbacks from our worthy customrs

on the website thanking for our 2V0-71.21 learning guide, Before you purchase our VMware 2V0-71.21 test questions, you can download our test dumps pdf free demo, it is free for you to review and you can consider our questions availability.

To achieve your goal, you may face both the chance of victory or failure, We can't say **2V0-71.21 Reliable Dumps Free** it's the best reference, but we're sure it won't disappoint you, There is obviously no one who doesn't like to receive his or her goods as soon as possible after payment for something (2V0-71.21 test-king guide), and it goes without saying that time is pretty precious especially for those who are preparing for the exam (2V0-71.21 test guide), so our company has attached great importance to the speed of delivery.

Free PDF Quiz Authoritative VMware - 2V0-71.21 - Professional VMware Application Modernization Reliable Dumps Free We can assure you that you can get the best 2V0-71.21 questions and answers at the unbeatable price in this website, They will answer your questions about our 2V0-71.21 study guide quickly.

The APP on-line test engine has many functions below, So your chance of getting success will be increased greatly by our 2V0-71.21 exam questions, When it refers to a good practice material, what aspects will you concern with?

They can provide remote online help whenever you need, We are the living examples for clients, because we are selling 2V0-71.21 exam study material as well as promote our images of company.

Once there emerge a sign of updating, we will update our 2V0-71.21 exam pass-sure files and inform you of the latest version immediately, With the development of our society, express delivery has been a fashion trend.

NEW QUESTION: 1

After adding a single VM vApp backend to an existing 4VM vApp deployment, by default, what would the tertiary backend instance names be?

- A. apg5, apg6, apg7, apg8
- B. apg1, apg2, apg3, apg4
- C. Default, apg5, apg6, apg7, apg8
- D. Default, apg1, apg2, apg3, apg4

Answer: B

NEW QUESTION: 2

Which parameter determines whether a free of charge item is relevant for standard billing or pro forma billing?

Please choose the correct answer

- A. Customer group
- B. Order type

C. Item category

D. Payment term

Answer: C

NEW QUESTION: 3

You need to deploy Appl.

How should you install Appl?

A. as a RemoteApp program

B. on a Client Hyper-V virtual machine

C. locally

D. as a Microsoft Application Virtualization (App-V) package

Answer: A

Explanation:

Testlet 1

Overview

General Overview

Litware, Inc. is an international manufacturing company that has 1,500 employees.

Litware has a main office and a branch office. The main office is located in Montreal. The branch office is located in Seattle. The offices connect to each other by using a WAN link.

Network Configuration

The environment contains a production network and a development network. The two networks are isolated from one another. The networks use the addressing schemes shown in the following table.

Router interfaces are assigned the first IP address on each subnet.

Existing Environment

Active Directory

The network contains two Active Directory forests named litware.com and dev.litware.com. Each forest contains a single domain. The functional level of both forests is Windows Server2012 R2.

Management Infrastructure

Litware has a deployment of Microsoft System Center 2012 R2

Configuration Manager. On the production network in the

Montreal office, Configuration Manager agents are installed on the client computers that run Windows 8.1 Enterprise.

Configuration Manager is used only to deploy Windows updates.

Operating systems are deployed either manually or by using Windows Deployment Services (WDS).

Configuration Manager servers and WDS servers have the

Microsoft Deployment Toolkit (MDT) 2013 installed Configuration Manager and MDT are integrated.

Windows Server and Client Environment

The network contains servers that run Windows Server 2012 R2.

The network contains the client computers configured as shown in the following table.

The relevant servers in the production network are configured as shown in the following table.

The relevant computers on the development network are configured as shown in the following table.

Problem Statements

Litware identifies the following issues on the networks:
IT administrators report that operating system deployment and license tracking of Windows

8.1 Enterprise are too labor intensive.
Certain internally developed applications have compatibility issues with Windows 8.1 Enterprise.

CustomSettings.ini

CustomSettings.ini on Server201 and Server301 will contain the following information:

Requirements

Business Goals

As much as possible, Litware plans to minimize the costs associated with purchasing hardware and software.

Planned Changes

Litware plans to implement the following changes to the networks:

On the production network, implement a Key Management Service (KMS).

Deploy a Configuration Manager agent to all of the production network computers.

On the production network, implement a Zero Touch deployment of Windows 8.1 Enterprise.

On the production network, deploy Windows 8.1 Enterprise to all of the client computers that run

Windows 7 Enterprise.

On the development network, implement a Lite Touch deployment of Windows 7 Enterprise and

Windows 8.1 Enterprise.

General Requirements

Litware identifies the following general requirements:

Images deployed by using Configuration Manager and WDS must include Windows updates that are

deployed already to the client computers.

The installation of Microsoft Office 2013 on the production and development networks must include

Outlook, Word, and Excel only.

The deployed operating system must take full advantage of the hardware platform to which it is

deployed.

Network traffic to the Internet and WAN traffic between the offices must be minimized, whenever

possible.

Administrative effort must be minimized, whenever possible.

Production Technical Requirements

Litware identifies the following technical requirements for the planned deployments to the production network:

Operating system deployments must include the latest Windows updates.

All SQL Server instances must be Standard edition or Enterprise edition.

Images copied between distribution points must NOT use any network bandwidth.

The Microsoft Assessment and Planning (MAP) Toolkit must be used for all assessments of the client

computers.

Operating system deployments to the production network computers must use Configuration Manager

integrated with MDT.

Office 2013 must be deployed to the production network computers by using Microsoft Application

Visualization (App-V).

Server1 and Server101 must be used for operating system deployments and Windows update

deployments to the production network computers.

All Configuration Manager operating system deployment task sequences must be capable of using the

settings configured in Customsettings.ini.

* The capture of reference images on the Configuration Manager servers must be implemented by using the build and capture a reference operating system image task sequence.

Development Technical Requirements

Litware identifies the following technical requirements for the planned deployments to the development network:

When reinstalling computers on the development network, the user state of the administrator account

and the local accounts must not be captured. The user state of all other accounts must be captured.

Application compatibility issues of internally developed applications must be identified by monitoring the

execution of each application on the Windows 8.1 Enterprise computers.

Server201 and Server301 must be used for operating system deployments to the development network

computers by using WDS integrated with MDT.

All new systems on the development network must run Windows 7 Enterprise x86/x64 or Windows 8.1

Enterprise x86/x64.

Office 2013 must be deployed to the development network by using Windows Installer (MSI) package-

based installations.

All computers deployed to the development network must be periodically reinstalled.

NEW QUESTION: 4

You have an Azure subscription that contains the web apps shown in the following table.

For which web app can you configure a WebJob?

- A. WebApp4
- B. WebApp1
- C. WebApp2
- D. WebApp3

Answer: A

Explanation:

Explanation

Publishing a .NET Core WebJob to App Service from Visual Studio uses the same tooling as publishing an ASP.NET Core app.
