**Answer: A**

**NEW QUESTION: 2**

- A. Option B
- B. Option C
- C. Option D
- D. Option A

**Answer: B**

**NEW QUESTION: 3**

What is the purpose of LCP?

- A. to encapsulate multiple protocols
- B. to negotiate control options
- C. to specify asynchronous versus synchronous
- D. to perform authentication

**Answer: B**

Explanation:

Explanation/Reference:

Link Control Protocol

Reference:

<http://www.ietf.org/rfc/rfc1661.txt>

In order to be sufficiently versatile to be portable to a wide variety of environments, PPP provides a Link Control Protocol (LCP). The LCP is used to automatically agree upon the encapsulation format options, handle varying limits on sizes of packets, detect a looped-back link and other common misconfiguration errors, and terminate the link. Other optional facilities provided are authentication of the identity of its peer on the link, and determination when a link is functioning properly and when it is failing.
