However, H13-723_V2.0 training materials can send the certification to you within the shortest time, In addition, the demo for the H13-723_V2.0 vce test engine is the screenshot format which allows you to scan.

NEW QUESTION: 1

A company has a single-forest and single Active Directory Domain Services domain named contoso.com. The company has offices in multiple geographic locations and manages all

computing devices from a network operations center located at a main office.

You deploy physical servers and user devices by using a Windows Deployment Services (WDS) server named WDS1, and a server that runs System Center 2012 Virtual Machine Manager SP1 named VMM1. Every three months you update the standard deployment images and push the update images to all client devices in the organization. You use multicast deployments for the servers and client devices at the remote offices. To automate the deployment process, you create an Auto-Cast multicast transmission and pre-stage client devices.

You need to ensure that client devices continue the deployment process after the first reboot and do not restart the installation.

What should you do?

- A. Option C
- B. Option D
- C. Option B
- D. Option A

Answer: C

Explanation:

The Set-WdsClient cmdlet modifies a pre-staged client device. The parameter -PxePromptPolicy<PxePromptPolicy> specifies the prompt policy for this computer to boot in PXE. The acceptable values for this parameter are:

- Adopt
- NoPrompt
- OptIn
- OptOut

Wdsclient PxePromptPolicy

Incorrect:

Not B: The New-WdsClient cmdlet creates a pre-staged client, but here the pre-staged clients have already been created.

Not C: The computer must be configured to continue the boot process without user interaction (for example, by pressing F12).

The AllowN12ForNewClients option is regarding if the user must press F12. If we set this option to No, they user would be required to press the F12 key.

NEW QUESTION: 2

Instructions

This item contains several questions that you must answer. You can view these questions by clicking on the corresponding button to the left. Changing questions can be accomplished by clicking the numbers to the left question. In order to complete the questions, you will need to refer to the topology.

To gain access to the topology, click on the topology button of the screen. When you have finished viewing the topology, you can return to your questions by clicking on the Questions

button to the left.

Each of the windows can be minimized by clicking on the [-]. You can also reposition a window by dragging it by the title bar.

Scenario

Refer to the topology. The diagram represents a small network with a single connection to the Internet.

When a packet is sent from Host 1 to Server 1, in how many different frames will the packet be encapsulated as it is sent across the internetwork?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: C

Explanation:

Explanation/Reference:

Explanation:

We believe the correct answer is 3 because the packet will be encapsulated in one more frame sent between routers R1 and R2. Source MAC is interface S0/0/0 on router R1 and destination is the serial interface on router R2.

NEW QUESTION: 3

A BizTalk Server 2010 solution uses an orchestration that performs several actions. The orchestration uses Expression shapes and Message Assignment shapes. The orchestration has no Scope shapes and the Transaction Type property is set to None. Occasionally, an XLANG exception is thrown in the orchestration. The exception is not handled and the orchestration goes into a suspended state. You need to catch the exception and handle the error. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Add an exception handler. Set the Exception Object Type property to System.SystemException.
- B. Add an exception handler. Set the Exception Object Type property to Microsoft.XLANGs.BaseTypes.XLANGsException.
- C. Add a Scope shape to the orchestration. Place all Expression and Message Assignment shapes within this scope.
- D. Set the Transaction Type property of the orchestration to Long Running. Set the Compensation property of the orchestration to Default.

Answer: B,C

NEW QUESTION: 4

Which of the below is NOT a level of the IT Operations

Management (ITOM) Product Suite?

Response:

- A. Enterprise
- B. Professional
- C. Corporate
- D. Standard

Answer: C
