A solutions architect must implement a solution that will prevent the use of each member account's root user Which service control policy (SCP) should the solutions architect apply to the organization root to meet this requirement?

A. Option B
B. Option A
Answer: B

NEW QUESTION: 2
What is used to determine compressed air cleanliness?
A. Needle pressure gauge
B. Blotter test
C. Psychrometer
D. Profilometer
Answer: D

NEW QUESTION: 3
An employee connects a wireless access point to the only jack in the conference room to provide Internet access during a meeting. The access point is configured to use WPA2-TKIP. A malicious user is able to intercept clear text HTTP communication between the meeting attendees and the Internet. Which of the following is the reason the malicious user is able to intercept and see the clear text communication?
A. The malicious user is able to capture the wired communication.
B. The meeting attendees are using unencrypted hard drives.
C. The malicious user has access to the WPA2-TKIP key.
D. The wireless access point is broadcasting the SSID.
Answer: A
Explanation:
Explanation/Reference:
Explanation:
In this question, the wireless users are using WPA2-TKIP. While TKIP is a weak encryption protocol, it is still an encryption protocol. Therefore, the wireless communications between the laptops and the wireless access point are encrypted.
The question states that user was able to intercept 'clear text' HTTP communication between the meeting attendees and the Internet. The HTTP communications are unencrypted as they travel over the wired network. Therefore, the malicious user must have been able to capture the wired communication.
TKIP and AES are two different types of encryption that can be used by a Wi-Fi network. TKIP stands for "Temporal Key Integrity Protocol." It was a stopgap encryption protocol introduced with WPA to replace the very-insecure WEP encryption at the time. TKIP is actually quite similar to WEP encryption. TKIP is no longer considered secure, and is now deprecated.

NEW QUESTION: 4
You have 100 computers that run Windows 8.1.
You plan to deploy Windows 10 to the computers by performing a wipe and load installation.
You need to recommend a method to retain the user settings and the user data.
Which three actions should you recommend be performed in

sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:
Explanation:
