Testing Engine Features, If you find any problem in GCP-GC-IMP Genesys Cloud Certified Professional - Implementation Exam material or have any ambiguity, then feel free to contact our customer support, as our support team will always get back to you, with best possible solution to your GCP-GC-IMP exam dumps related query.

Every addition or subtraction of GCP-GC-IMP exam dumps in the exam syllabus is updated in our brain dumps instantly, These tools are ready to give you right kind of preparation for the exam and through them GCP-GC-IMP updated cbt will not be a difficult task for you to get achiev Khimunin's your turn to get properly prepared for GCP-GC-IMP Genesys latest video lectures through great helping tools of Khimunin like many other people and make your career.

Pass Guaranteed 2021 GCP-GC-IMP: Efficient Genesys Cloud Certified Professional - Implementation Study Plan
I believe that you will pass GCP-GC-IMP exam test successfully, We are providing 24/7 customer service so you can contact us at anytime, And some times, we will give discounts for them.

Contending for the success fruit of GCP-GC-IMP practice exam, many customers have been figuring out the effective ways to pass it, It is undeniable that a useful practice material is reliable for your exam.

Along with rapid development trend of IT industry, the role and skills required of a core network GCP-GC-IMP technological engineer are evolving and more vital than ever.

As the proverb goes "Sharp tools make good work", Our GCP-GC-IMP Troytec: Genesys Cloud Certified Professional - Implementation bank grasps of the core knowledge and key point of VCE examination, the high-efficiency Genesys Cloud Certified Professional - Implementation software ensures **Study GCP-GC-IMP Plan** our candidates to be familiar with the exam content, and thus they are more likely to pass the exam.

You really can't find a more cost-effective product than GCP-GC-IMP Exam Bootcamp learning quiz, All exam materials in GCP-GC-IMP learning materials contain PDF, APP, and PC formats.

Then they will purchase various kinds of our GCP-GC-IMP learning braindumps at once, Ability to get to know the real GCP-GC-IMP Exam.

NEW QUESTION: 1

Click the Exhibit button.

[\[email protected\]](#)> show pim join extensive Instance:
PIM. master Family: INET R = Rendezvous Point Tree, S = Sparse, W = Wildcard

Group: 224.50.50.50 Source: * RP: 10.100.100.10 Flags: sparse,rptree,wildcard Upstream interface: ge-0/0/10.0 Upstream neighbor: 172.28.55.5 Upstream state: Join to RP Uptime: 00:00:10 Downstream neighbors: Interface: ge-0/0/2.0 172.28.57.5 State: Join Flags: SRW Timeout: 209 Group: 224.50.50.50 Source: 10.100.10.10 Flags: sparse,spt Upstream interface: ge-0/0/6.0 Upstream neighbor: 172.28.56.5 Upstream state: Join to Source, Prune to RP Uptime: 00:00:10 Keepalive timeout: 276 Downstream neighbors: Interface: ge-0/0/2.0 172.18.57.5 State: Join Flags: S Timeout: 209

Referring to the output shown in the exhibit, which three statements are true about the PIM implementation on R1? (Choose three.)

- A. Interface ge-0/0/10 provides the shortest path to the source.
- B. The multicast stream flows from 10.100.10.10 to 172.18.57.5.
- C. Interface ge-0/0/6 provides the shortest path to the source.
- D. R1 is receiving multicast traffic over the SPT.
- E. R1 is receiving multicast traffic over the RPT.

Answer: B,C,D

NEW QUESTION: 2

DRAG DROP

You need to recommend a solution to monitor App2.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Topic 4, Litware, Inc (A)

Overview

Litware, Inc. is a manufacturing company. Litware has a large data center and several offices.

Existing Environment

Network Infrastructure

The network contains a third-party network management device that supports SNMPv3. The network contains network devices that support ICMP and SNMP and other devices that support SNMP only. A group named Network Technicians contains the user accounts for the support technicians who manage all of the network servers. The support technicians regularly install updates on the network servers.

System Center 2012 Infrastructure

Litware has all of the System Center 2012 components installed in the data centers. Service Manager is integrated with Configuration Manager and Operations Manager.

The System Center 2012 Monitoring Pack for UNIX and Linux Operating Systems is installed on the Operations Manager servers.

Software updates are deployed by using Windows Server Update Services (WSUS) and Configuration Manager.

Virtualization Infrastructure

Litware has 30 Hyper-V hosts that run Windows Server 2008 R2. The Hyper-V hosts are members of failover clusters.

Each office contains two virtual machines that run Microsoft SQL Server 2008 R2. The virtual machines are configured in a failover cluster.

You have 100 virtual machines that run the following operating systems:

Windows Server 2012 Windows Server 2008 R2 Windows Server 2003 R2 Red Hat Enterprise Linux 6 SUSE Linux Enterprise Server 11

Application Infrastructure

Litware has a distributed application named Appl that is installed on several virtual machines.

The failover clusters host the databases used by Appl. The components of Appl are in a service template and a distributed application design.

Several other applications are installed on dedicated application servers. The application servers are deployed as virtual machines.

Problem Statements

Litware identifies the following issues: The primary service of Appl, named ApplService, hangs frequently and logs events in the application log on the server where ApplService fails. A recent security audit discovers that servers are vulnerable to attack due to

-- ----

misconfigurations of the operating system.

Requirements

Planned Changes

Litware plans to implement the following changes: Replace the third-party network monitoring solution by using a System Center 2012 solution. The System Center 2012 solution must monitor all of the devices monitored by the third-party solution and must discover new devices. On all of the virtual machines that have Appl installed, update Appl to a new version.

Technical Requirements

Litware identifies the following technical requirements:

Application administrators must be able to back up and restore their respective application servers. Each server must be backed up at a different time. All virtual machines must be deployed by using virtual machine templates. The templates must be prepared by using Sysprep.

- All resolved Service Manager incidents must close automatically after 72 hours.

Availability Requirements

Litware identifies the following availability requirements: -
Each request by a support technician to place a server in maintenance mode must be approved by a network administrator. -
Appl must have 99.99 percent availability.

NEW QUESTION: 3

A company has several web servers that need to frequently access a common Amazon RDS MySQL Multi-AZ instance.

The company wants a secure method for the web servers to connect to the database while meeting a security requirement to rotate user credentials frequently.

A company has several web servers that need to frequently access a common Amazon ROS MySQL Muto-AZ DB instance.

The company wants a secure method for the web servers to connect to the database while meeting a security requirement to rotate user credentials frequently.

Which solution meets these requirements?

A. Store the database user credentials in files encrypted with AWS Key Management Service (AWS KMS) on the web server file system.

The web server should be able to decrypt the files and access the database

B. Store the database user credentials in AWS Secrets Manager. Grant the necessary IAM permissions to allow the web servers to access AWS Secrets Manager

C. Store the database user credentials in AWS Systems Manager OpsCenter.

Grant the necessary IAM permissions to allow the web servers to access OpsCenter

D. Store the database user credentials in a secure Amazon S3 bucket.

Grant the necessary IAM permissions to allow the web servers to retrieve credentials and access the database

Answer: B
