PDF can help you to prepare your exam according to your place and time, [CRT-261](#) Our study materials can give the user confidence and strongly rely on feeling, lets the user in the reference appendix not alone on the road, because we are to accompany the examinee on CRT-261 exam, candidates need to not only learning content of teaching, but also share his arduous difficult helper, so believe us, we are so professional company.

100% Pass CRT-261 - Certification Preparation for Service Cloud Consultant Newest Study Group  
You can learn the CRT-261 test prep at any time or place and repeatedly practice, After 10 years' developments, we pay more attention to customer's satisfaction of CRT-261 : Certification Preparation for Service Cloud Consultant free exam torrent as we have realized that all great efforts we have made are to help our candidates to successfully pass the CRT-261 exam.

Our CRT-261 online test engine will be a good tool to help you have a better understanding of the actual test, It boosts your confidence for CRT-261 real exam, and will help you remember the CRT-261 real exam's questions and answers that you will take part in.

All are orderly arranged in our practice materials, Most candidates have [Best C-THR97-2105 Practice](#) choice phobia disorder while you are facing so much information on the internet, Maybe you never find out your real interest in the past.

Our CRT-261 exam questions can provide you with services with pretty quality and help you obtain a certificate.

#### **NEW QUESTION: 1**

An established insurance (parent) company has legacy applications that require data in the COMMAREA format. It has acquired a small insurance (child) company with applications that use the XML format for application communication. The parent company wants to use the child company's web customer portal.

This requires interaction between the legacy and modern application to process a transaction. How should the system administrator implement this requirement?

- A.** Implement WebSphere Message Broker and route the request in specified formats to the target components.
- B.** Implement two different format request invocation from the web application and use WebSphere Message Broker to route to

the target components.

**C.** Web application routes the request in the format required by the target components, passing thru WebSphere Message Broker.

**D.** Web application invokes the modern application on XML format request then process the legacy application request.

**Answer: A**

**NEW QUESTION: 2**

Which of the following documents is a narrative description of products or services to be supplied by the project and has detailed requirements and pricing specified on it?

**A.** Project charter

**B.** Statement of work (SOW)

**C.** Scope of statement

**D.** WBS

**Answer: B**

Explanation:

A statement of work (SOW) is a document that captures and defines the work activities, deliverables and timeline that a vendor will execute against in performance of work for a customer.

Detailed requirements and pricing are usually specified in it, along with many other terms and conditions. SOW is a narrative description of products or services to be supplied by the project.

For internal projects, the project initiator or sponsor provides the statement of work based on business needs, product, or service requirements. For external projects, the statement of work can be received from the customer as part of a bid document.

Answer option A is incorrect. Scope of statement gives the narrative description of the project scope.

Answer option B is incorrect. Project charter is a document that formally authorizes a project manager to work on a project.

Answer option D is incorrect. WBS is a tool that defines a project and groups the project discrete work in a way that helps organize and define the total work scope.
