Also, we have the chance to generate a golden bowl for ourselves.

#### **NEW QUESTION: 1**

You are designing an Azure SQL Data Warehouse for a financial services company. Azure Active Directory will be used to authenticate the users.

You need to ensure that the following security requirements are met:

- \* Department managers must be able to create new database.
- \* The IT department must assign users to databases.
- \* Permissions granted must be minimized.

Which role memberships should you recommend? To answer, drag the appropriate roles to the correct groups. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer :**
