**Answer: B**

Explanation:

Topic 1, A. Datum

Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Current Infrastructure A . Datum recently purchased a Microsoft 365 subscription.

All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, [email#160;protected] or user2#uk.ad3tum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.

A . Datum uses and processes Personally Identifiable Information (PII).

## Problem Statements

### Requirements

A . Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365.

### Business Goals

A . Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates.

A . Datum wants to minimize the cost of hardware and software whenever possible.

### Technical Requirements

A . Datum identifies the following technical requirements:

- \* Centrally perform log analysis for all offices.

- \*Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.

- \*Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.

- \*Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.

- \*Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.

- \*If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.

- \*A security administrator requires a report that shows which Microsoft 365 users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.

- \*Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive

U.S. PII data.

## **NEW QUESTION: 2**

Your network contains an Active Directory domain named contoso.com. The domain contains an Exchange Server 2010 Service Pack 1 (SP1) organization.

The domain contains an organizational unit (OU) named Sales. You need to configure Outlook Web App to meet the following requirements:

Allow only members of the Sales OU to change their password by using the Exchange Control Panel (ECP).

Prevent all other users from changing their password by using the ECP.

What should you do?

To answer, move the appropriate actions from the list of

actions to the answer area and arrange them in the correct order.

- A.** Modify the Authentication settings of the OWA virtual directory.
- B.** From the Exchange Management Shell, run `Get-mailbox | where-object {$_.distinguishedname -like '*ou=accounting,dc=contoso,dc=com'} | Set-Mailbox-RoleAssignmentPolicy:Accounting.`
- C.** Modify the Segmentation settings of the default Outlook Web App mailbox policy.
- D.** Create a New Outlook Web App mailbox policy named Accounting.
- E.** Modify the Authentication settings of the ECP virtual directory.
- F.** Run the configure External Client Access Domain wizard.
- G.** From the Exchange Management Shell, run `Get-mailbox | where-object {$_.distinguishedname -like '*ou=accounting,dc=contoso,dc=com'} | Set-CasMailbox-OWAMailboxPolicy:Accounting.`

**Answer: C,D,G**

Explanation:

1. Create a New Outlook Web App mailbox policy named Accounting.
2. From the Exchange Management Shell, run `Get-mailbox | where-object {$_.distinguishedname -like '*ou=accounting,dc=contoso,dc=com'} | Set-CasMailbox-OWAMailboxPolicy:Accounting.`
3. Modify the Segmentation settings of the default Outlook Web App mailbox policy.
