Answer: D

NEW QUESTION: 3

Which condition would require the use of a Custom Operator instead of a BuildOp or Transformer?

- A. The stage needs to run in parallel rather than sequentially.
- B. The stage requires dynamic metadata.
- C. The stage is working with string variables.
- D. The stage will call external routines written in C/C++.

Answer: B

NEW QUESTION: 4

You have a table with the following definition:

```
CREATE TABLE long_tab  
(id NUMBER);  
long_col LONG)
```

You need to convert the LONG_COL column from a LONG data type to a LOB data type. Which statement accomplish this task?

- A. EXECUTE dbms_manage.lob.migrate(long_tab, long_col, clob)
- B. ALTER TABLE long_tab MODIFY (LONG_COL CLOB);
- C. EXECUTE utl_manage_lob.migrate(long_tab, long_col, clob)
- D. EXECUTE dbms_lob.migrate(long_tab, long_col, clob)
- E. EXECUTE utl_lob.migrate(long_tab, long_col, clob)

Answer: B

Explanation:

In Oracle 9i, a LONG column in a Table can be migrated to a LOB column using the ALTER

TABLE statement. The syntax is:

```
ALTER TABLE <schema>.<table name>  
MODIFY <long column name> {CLOB | BLOB | NCLOB}
```

In Oracle 8i you must use the TO_LOB function to migrate an existing LONG column to a LOB column.

This function can only be used in the SELECT list of a subquery in an INSERT Statement.
