As you may see the data on the website, our sales volumes of our H13-221_V1.0 exam questions are the highest in the market, Our H13-221_V1.0 practice materials capture the essence of professional knowledge and lead you to desirable results effortlessly.

I will recommend our study materials to you, The privacy information **Valid Dumps H13-221_V1.0 Questions** provided by you only can be used in online support services and providing professional staff remote assistance.

We want to eliminate all unnecessary problems for you, and you can learn our H13-221_V1.0 exam questions without any problems, Our workers have tested the H13-221_V1.0 exam simulator for many times, there must be no problems.

You must try everything that you want to do.

NEW QUESTION: 1

SIMULATION

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab

You may start the lab by clicking the Next button.

You plan to create several virtual machines in different availability zones, and then to configure the virtual machines to load balanced connections from the internet.

You need to create an IP address resource named ip1006 to support the planned load balancing solution.

The solution must minimize costs.

What should you do from the Azure portal?

A. We should create a public IP address.

Step 1: At the top, left corner of the portal, select + Create a resource.

Step 2: Enter public ip address in the Search the Marketplace box. When Public IP address appears in the search results, select it.

Step 3: Under Public IP address, select Create.

Step 4: Enter, or select values for the following settings, under Create public IP address, then select Create:

Name: ip1006

SKU: Basic SKU

IP Version: IPv6

IP address assignment: Dynamic

Subscription: Select appropriate

Resource group: Select appropriate

B. We should create a public IP address.

Step 1: At the top, left corner of the portal, select = Create a resource.

Step 2: Enter public ip address in the Search the Marketplace box. When Public IP address appears in the search results, select it.

Step 3: Under Public IP address, select Create.

Step 4: Enter, or select values for the following settings, under Create public IP address, then select Create:

Name: ip1008

SKU: Basic SKU

IP Version: IPv4

IP address assignment: Dynamic
Subscription: Select appropriate
Resource group: Select appropriate

Answer: A

NEW QUESTION: 2

DRAG DROP

You administer a virtual machine (VM) that is deployed to Azure. The VM hosts a web service that is used by several applications.

You need to ensure that the VM sends a notification in the event that the average response time for the web service exceeds a pre-defined response time for an hour or more.

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

1. From configure page, add a monitoring endpoint for the virtual machine
2. From the monitor page, Add a metric for the Response Time for the end point
3. From the Monitor page, add a rule for the response time of the end point.
