Getting certified is really a good way to advance your career in the IT industry, Excellent materials offering help, But our 46150T study materials have the high pass rate as 98% to 100%, so it is guarantee for you to pass.

#### **NEW QUESTION: 1**

Jones had been trying to penetrate a remote production system for the past two weeks.

This time however, he is able to get into the system. He was able to use the system for a period of three weeks. However law enforcement agencies were recording his every activity and this was later presented as evidence. The organization had used a virtual environment to trap Jones. What is a virtual environment?

- A. A honeypot that traps hackers
- B. An environment set up before an user logs in
- C. A system using Trojaned commands
- D. An environment set up after the user logs in

**Answer: A**

**NEW QUESTION: 2**

DRAG DROP

You are the Office 365 administrator for your company. The company has multiple Microsoft SharePoint Online sites that are shared with external users. Individual documents have also been shared from other Microsoft SharePoint Online sites. The company recently ended collaboration with a vendor named Contoso, Ltd.

You need to revoke all sharing with external users who log in with contoso.com accounts without affecting sharing with other vendors.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Box 1:

Box 2:

Box 3:

Contoso users have access to multiple shared files and multiple shared sites throughout the SharePoint site structure.

The easiest way to remove Contoso users' access to all the shared resources is to remove the Contoso users at the top level of the SharePoint structure, the Tenant.

The Remove-SPOExternalUser PowerShell cmdlet is used to remove a collection of external users from the tenancy's folder.

To run the Remove-SPOExternalUser cmdlet, we first need to open the SharePoint Online management Shell (Step 1) and connect to the SharePoint Online tenant by running the Connect-SPOService cmdlet (Step 2). We can then run the Remove-SPOExternalUser cmdlet as in Step 3.
