**NEW QUESTION: 1**

What is messages.js file used for?

- A. This file contains the texts of application pop-up prompts
- B. This file contains strings that can be used for application elements
- C. This is an internal framework file. It is used to store system messages for debugging purposes
- D. This file contains the texts of error messages that application may show

**Answer: B**

**NEW QUESTION: 2**

A publishing company used AWS Elastic Beanstalk, Amazon S3, and Amazon DynamoDB to develop a web application. The web application has increased dramatically in popularity, resulting in unpredictable spikes in traffic. A DevOps Engineer has noted that 90% of the requests are duplicate read requests. How can the Engineer improve the performance of the website?

- A.** Use Amazon ElastiCache for Redis to cache repeated read requests to DynamoDB and AWS Elemental MediaStore to cache images stored in S3.
- B.** Use Amazon ElastiCache for Memcached to cache repeated read requests to DynamoDB and Varnish to cache images stored in S3.
- C.** Use DynamoDB Accelerator to cache repeated read requests to DynamoDB and Amazon CloudFront to cache images stored in S3.
- D.** Use DynamoDB Streams to cache repeated read requests to DynamoDB and API Gateway to cache images stored in S3.

**Answer: C**

Explanation:

<https://aws.amazon.com/blogs/aws/amazon-dynamodb-accelerator-dax-in-memory-caching-for-read-intensive-workloads/>  
<https://aws.amazon.com/dynamodb/dax/>

**NEW QUESTION: 3**

- A.** Option A
- B.** Option C
- C.** Option D
- D.** Option B

**Answer: B**

Explanation:

Explanation

When you start Nslookup from a command line, the following error message may be displayed: DNS request timed out timeout was x seconds Can't find server name for address

xxx.xxx.xxx.xxx: Timed out Default servers are not available

Default Server: UnKnown Address: xxx.xxx.xxx.xxx where

xxx.xxx.xxx.xxx is the Internet Protocol (IP) address of the host on which you are attempting to start Nslookup.

**CAUSE** When Nslookup starts, it attempts to resolve the IP address of its host's DNS server to its fully qualified domain name (FQDN). If the DNS server does not respond or if the DNS server's reverse lookup zones do not contain a PTR record for the DNS server's IP address, the error message is displayed.
