First you need it, As you know, the competition between candidates is fierce.

NEW QUESTION: 1

Gibson purchased stock with a fair market value of \$14,000 from Gibson's adult child for \$12,000.

The child's cost basis in the stock at the date of sale was \$16,000. Gibson sold the same stock to an unrelated party for \$18,000. What is Gibson's recognized gain from the sale?

- A. \$4,000
- B. \$2,000
- C. \$0
- D. \$6,000

Answer: B

Explanation:

Explanation

Choice "b" is correct. Losses are disallowed on most related party sales transactions even if they were made at an arm's length (FMV) price. The basis (and related gain or loss) of the (second) buying relative depends on whether the second relative's resale price is higher, lower, or between the first relative's basis and the lower selling price to the second relative. In this case, the \$4,000 capital loss on the sale by Gibson's adult child to Gibson [\$12,000 SP - \$16,000 Basis] is disallowed. Gibson's basis is determined by his selling price to a third party. In this case, the selling price is \$18,000, which is HIGHER than the original basis of Gibson's adult child. Gibson's basis in the stock is, therefore, his adult child's basis of \$16,000. Gibson's recognized basis is calculated as follows:

Choice "a" is incorrect. There would be a zero gain or loss if the selling price were between the adult child's basis and Gibson's purchase price, but this is not the case in the facts. Choice "c" is incorrect. This answer option uses the fair market value of the stock at the date of purchase as the basis. As is discussed above, the rules do not provide for this treatment. [\$18,000 SP

- \$14,000 FMV = \$4,000]

Choice "d" is incorrect. This would be the answer if the basis were Gibson's purchase price of \$12,000; however, because the stock sold for more than Gibson's child's basis and the child had a disallowed loss on the sale to Gibson, Gibson is allowed to use his child's original basis of \$16,000 as his basis for the stock on the date of the second sale. [\$18,000 SP - \$12,000 PP = \$6,000]

Answer: B,C

NEW QUESTION: 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a form for Dynamics 365 Finance. You need to add a button that allows users to run a report. Solution: Create an action menu item. Add the action menu item to the form button and then link the report to the action menu item.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:
